

CONDENSED AIR BATH SANITARIUM

ROCHESTER, N. Y.,

For the Cure of Chronic Diseases

CONDUCTED BY

J. L. STONE, M. D.

Graduate of Medical Department of University of New York (Allopathic) and Chicago Homoeopathic College.

These baths have been used in France and Germany for many years by at least a score of the most prominent physicians with marvellous results. The largest institution of the kind in Europe is at Reichenhall, conducted by the celebrated Dr. Von Liebig (son of Professor Von Liebig, the distinguished chemist). The following letter was received from him nearly two years ago:

MUNICH, 25 March, 1882.

Dr. J. L. STONE:
Dear Sir—Excuse my delay in answering your letter. I had to wait for a copy of the accompanying article on the action of compressed air to send to you. The pneumatic chambers at Reichenhall, proprietor Mr. E. Mack, are still enlarging the circle of their patrons. Last summer there were so many applicants that at the highest of the season the new chambers had to wait from eight to fourteen days for a seat, and the sittings went on the whole day. There were in the whole, 277 persons, who took more than 600 single air-baths. In consequence, Mr. Mack is erecting now a new chamber with twelve seats, and will be able, with this and the others, to accommodate twenty-nine persons at a time. The establishment at Reichenhall is frequented only during the summer. I shall return to Reichenhall for the season in the beginning of May.

The Doctor goes on to enumerate several interesting works, giving the remarkable results of this treatment and closes with the most cordial encouragement.

Our experience in Rochester has satisfied us that in probably ninety per cent. of the cases coming for treatment, the Condensed Air Baths alone will cure, or do infinitely more for them than any other or all other means united; yet in exceptional cases, other agents may be advantageously combined with auxiliary treatment, hence I have appliances for improved Turkish, plain and medicated water baths, salt, sponge, sitz and baths, etc.

The appliances for giving electricity are modern and complete. I have studied every branch of medicine in both schools, and do not hesitate about giving medical or surgical treatment when needed.

Invalids are confidently requested to visit this institution on returning North, which they will find furnished with elevator, electric call bells and every comfort of a first-class sanitarium; and yet there is nothing of the "hospital" air or appearance.

Send for pamphlet, giving full information, references, etc., to

The Philadelphia Times.

1884.

THE PHILADELPHIA TIMES, 1884.

The value of a newspaper is not in its size or display, but in the intelligence and care, the conscientiousness and freshness with which it is edited. The Times spends lavishly for news from all parts of the world, but all its dispatches are carefully edited and condensed, in order to give the complete news of the day in the most concise and attractive shape, and with it a large variety of entertaining and instructive reading. The best writers at home and abroad are employed to enrich its columns, and to make it a journal of the highest quality, a welcome visitor to intelligent and honest citizens of every political, religious and social faith.

THE SUN.

NEW YORK, 1884.

About sixty million copies of THE SUN have gone out of our establishment during the past twelve months.

If you were to paste end to end all the columns of all THE SUN printed and sold last year, you would get a continuous strip of interesting information, common sense wisdom, sound doctrine, and sane wit long enough to reach from Printing House square to the top of Mount Copernicus in the moon, then back to Printing House square, and then three-quarters of the way back to the moon again.

But THE SUN is written for the inhabitants of the earth; this same strip of intelligence would girdle the globe twenty-seven or twenty-eight times.

If every buyer of a copy of THE SUN during the past year has spent only one hour over it, and if his wife or his grandfather has spent another hour, this newspaper in 1883 has afforded the human race thirteen thousand years of steady reading, night and day.

It is only by little calculations like these that you can form any idea of the circulation of the most popular of American newspapers, or of its influence on the opinions and actions of American men and women.

THE SUN is, and will continue to be, a newspaper which tells the truth without fear or consequence, which gets at the facts no matter how much the process costs, which presents the news and the world without waste of words and in the most readable shape, which is working with all its heart for the cause of honest government, and which therefore believes that the Republican party must go, and must go in this coming year of our Lord, 1884.

If you know THE SUN, you like it already, and you will read it with accustomed diligence and profit during what is sure to be the most interesting year in its history. If you do not know THE SUN, it is high time to get into the sunshine.

Terms to Mail Subscribers. The several editions of THE SUN are sent by mail, postpaid, as follows: DAILY—30 cents a month, \$2 a year; with Sunday edition, \$7.

SUNDAY—Eight pages. This edition furnishes the current news of the world, special articles of exceptional interest to everybody, and literary reviews of new books of the highest merit. \$1 a year.

WEEKLY—\$1 a year. Eight pages of the best matter of the daily issues; an Agricultural Department of unequalled value; special market reports, and literary, scientific, and domestic intelligence make THE WEEKLY SUN the newspaper for the farmer's household. To clubs of ten with \$10, an extra copy free.
